

Now You Have A Real CHOICE!

Recent discoveries in soil surfactant chemistry have allowed Aqua-Aid to develop **Aquifer**, a new choice in soil surfactants. **Aquifer** produces and maintains an omni directional flow of applied irrigation and/or natural rain water. **Aquifer's** exceptionally unique characteristic of producing downward and lateral movement of water (omni directional) provides a uniform moisture profile throughout the soil structure for up to 45 days.

This allows not only water, but also chemicals and nutrients to be distributed evenly throughout the root zone. The end result is dramatically less summer stress, reduced wilt, less localized dry spots and improved re-wetting capability.

Aquifer is one of three proven soil surfactants that Aqua-Aid offers. Each formulation is superior in its specific design as a penetrant and/or omni directional surfactant. Aqua-Aid surfactant products will not burn when applied at the recommended rates.

All Aqua-Aid products come with a 100% money back guarantee.

For more information on Aqua-Aid's soil management program for you and your turf, call or write:

AQUIFER™ Liquid

An Aqua-Aid soil surfactant that produces a long lasting omni-directional flow of applied water. AQUIFER's non-ionic, non-toxic, and non-burning formulation of soil surfactants can be applied any time of the day and does not have to be watered in. A great tool for preventing the formation of localized dry spots and increasing the water retention in well drained soils.

Maintenance Program – Apply 4 ounces/M every month

Localized Dry Spots – Apply 6 to 8 ounces/M every month until problem is solved

AQUA-AID™ Liquid

Aqua-Aid Liquid is the most cost-effective wetting agent on the market today. The wetting agent the golf industry has used as a standard. Very effective at low rates for treating irrigation water. Aqua-Aid liquid is a non-ionic, non-toxic and non-burning formulation of wetting agents that can be applied any time of the day. Aqua-Aid liquid does not have to be watered in. A great tool for injection through irrigation systems. Aqua-Aid Pellets and Aqua-Aid Granular are also available.

Maintenance Program – Apply 2 to 4 ounces/M every month

Injection – Inject 1 to 4 quarts/Acre every month

AQUA-ROOT™ Liquid

A unique combination of a natural chelator, Humate and Aqua-Aid. Designed to promote root growth and provide a stable soil/moisture profile. A great tool to enhance the effectiveness of applied nutrients and pesticides. Aqua-Root Pellets and Aqua-Root Granular are also available.

Maintenance Program – Apply 2 to 4 ounces/M every month

Tank Mixing – Tank mix one gallon per 100 gallons of spray solution

CARBO-AID™ Liquid

A high complex carbohydrate food supplement for the soil microbes. Designed to enhance the natural complex solution that is normally supplied by the plant as food for the soil microbes. A “Back to Basics” tool in soil ecology. A great tool for injection through irrigation systems.

Maintenance Program – Apply 8 to 16 ounces/M every month

Injection – Inject 2.5 to 5 gallons/Acre every month
