

AcidipHy™ GRANULAR

Soil Acid Treatment

AQUA·AID

AcidipHy - Granular Soil Acid Treatment is a unique blend of buffered acidifying agents designed to help manage highly alkaline soil and the effects of poor quality water. By lowering the pH level of the soil, **AcidipHy** Granular helps reduce sodium build-up and dissolve unwanted bicarbonates to improve water penetration. **AcidipHy** Granular is easy to use and will not harm turf when used in accordance with product directions. When used as directed, **AcidipHy** Granular can be applied at anytime of the year as a cost effective method of treating the effects of poor water quality.
